Clay KY 2432 11-8001.00

QUESTION:

1. The description does not indicate but it is assumed the project is for Phase 2 design services and the Phase 1 work is complete for the sections of KY2432 and KY3472 identified in the bulletin. Please confirm.
2. The bulletin mentions primary and alternate design sections. With that understanding, the “Memorial Drive Color.pdf” (Available Studies) that was referenced in the bulletin does not match the primary project description which calls for work on KY2432 starting at 2nd Street. Is the primary route supposed to be along KY3472, starting at US421, to KY2432 at Coal Hollow Road? This would agree with the referenced PDF and the Description map shown for Item 11-8001.0 on the KYTC webpage. The alternate would then be KY2432, starting at 2nd Street, to the point it intersects KY3472 (Marcum Drive). Please confirm.
3. Has a Phase 1 study been completed for the section of KY2432 between 2nd Street and the point it intersections KY3472 (Marcum Ave.)

RESPONSE: KYTC has added a supporting document [11-8001 00 Project Scope.pdf](#) . The file contains a more detailed discussion of the scope of the project and addresses the 3 questions above.

The advertisement has been modified and reposted to include **Preliminary Engineering Services**.

In addition, the supporting document contains a link to the KYTC FTP site where all supporting files developed for the project to date can be downloaded.
